## SAFETY

1. Read the operator's manual carefully and familiarize yourself with the proper use of your attachment. Do not allow anyone who is not acquainted with the Safety Instructions to use your attachment.
2. Know the controls and how to stop them quickly. READ THE OPERATOR'S MANUAL!
3. Do not allow children to operate the machine. Do not allow adults to operate it without proper instruction.
4. Be especially watchful of children and pets entering into the area while operating.
5. Keep your eyes and mind on your machine while mowing or operating your attachment. Don't let others distract you.
6. Do not attempt to operate your machine when not in the driver's seat.
7. Always shut off blades and engine when emptying the container.
8. Stop machine, shut off deck attachment, set parking brake, shut off engine and remove ignition key before removing clogs, removing or replacing hose, boot, blower cone, or performing any maintenance.
9. Mow across the face of slopes (not more than 10 degrees); never up and down the face.
10. It is recommended that the collection bags be emptied when half full while operating on slopes. Start mowing on slopes when the collection bags are empty.
11. Inspect your lawn and remove any foreign objects before mowing. Never deliberately run the mower across any foreign object.
12. Wear hearing protection.
13. Wear eye protection to prevent debris from getting into your eyes.

# SAFETY

**WARNING!** NEVER operate the mower unless the discharge guard and either the deflector assembly or the vacuum collector adapter are fastened securely in place.

**WARNING!** Do not work around the mower deck boot or the blower area until you are certain that the mower blades and the blower impeller have stopped rotating.

**WARNING!** To avoid serious injury, perform maintenance on the vacuum collector; **ONLY AFTER STOPPING THE MOWER'S ENGINE AND WAITING FOR ALL MOVING PARTS TO COME TO A COMPLETE STOP.** Set the parking brake. Always remove the ignition key before beginning maintenance.

**WARNING!** For your own personal safety, **ALWAYS mow ACROSS the face of slopes and NEVER UP and DOWN the face. NEVER attempt to mow excessively steep slopes, and use caution when turning on any slope.**

## Safety Alert Symbol

This Safety Alert Symbol means: **“ATTENTION! BECOME ALERT! YOUR SAFETY IS INVOLVED!”**

This symbol is used to call attention to safety precautions that should be followed by the operator to avoid accidents. When you see this symbol, carefully read the message that follows and heed its advice. Failure to comply with safety precautions could result in death or serious bodily injury.

## Safety Signs

The signal words **DANGER**, **WARNING**, and **CAUTION** are used on the equipment safety signs. These words are intended to alert the viewer to the existence and the degree of hazard seriousness.

White letters on **RED**

This signal word indicates a potentially hazardous situation which, if not avoided, will result in death or serious injury.

Black letters on **ORANGE**

This signal word indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

It may also be used to alert against unsafe practices.

Black letters on **YELLOW**

This signal word indicates a potentially hazardous situation which, if not avoided, will result in minor or moderate injury.

It may also be used to alert against unsafe practices.

# PECO LIMITED WARRANTY FOR NEW PRODUCTS

New PECO, Inc. extends the following warranties to the ORIGINAL PURCHASER of each New PECO, Inc. consumer product purchased from one of our Dealers or directly from New PECO, Inc., subject to the following limitations:

## **A. ITEMS COVERED UNDER WARRANTY**

1. **PRODUCT WARRANTY** – Any part or parts which are deemed defective in material or workmanship, as delivered to the original purchaser, will either be repaired or replaced, as New PECO, Inc. elects, without charge for parts or labor, if the defect appears within 12 months from the date of purchase of the product to the Original Purchaser.
2. **PARTS REPLACED DURING WARRANTY** – Any New PECO, Inc. part which is furnished in performance of this warranty and is defective in material or workmanship as delivered to the purchaser will be repaired or replaced, as New PECO, Inc. elects, before the expiration of the original warranty period.

## **B. WARRANTY DISTINCTIONS**

1. **RESIDENTIAL** - Products put to a personal use around a single household or residence are considered Residential. Products designated as “Residential” are warranted for 12 months from the date of purchase of the product, to the ORIGINAL PURCHASER with proof of purchase, when used for or in residential applications.
2. **COMMERCIAL** – Products put to any business use (agricultural, commercial or industrial) or used at multiple locations are considered Commercial. Products designated as “Commercial” are warranted for 12 months from the date of purchase of the product, to the ORIGINAL PURCHASER with proof of purchase, when used for or in commercial applications. Products designated as “Residential” are warranted for 90 days from the date of purchase of the product, to the ORIGINAL PURCHASER with proof of purchase, when used for or in Commercial applications.
3. **RENTAL** – Products used for Rental or Lease Purposes are warranted for 45 days from date of purchase of the product, to the ORIGINAL PURCHASER with proof of purchase, when used for or in a rental business.

## **C. ITEMS NOT COVERED BY NEW PECO WARRANTY**

1. **ENGINES & BATTERIES:** Engines and Batteries attached to New PECO, Inc. products are covered under their respective separate manufacturer warranties and those companies must be contacted directly to file a warranty claim. Briggs & Stratton: [https://www.briggsandstratton.com/na/en\\_us/support/warranty.html](https://www.briggsandstratton.com/na/en_us/support/warranty.html)
2. **UNAPPROVED ALTERATION OR MODIFICATION:** All obligations of New PECO, Inc. under this warranty shall be terminated if products are altered or modified in any way not approved by New PECO, Inc.
3. **ACCIDENTS & NORMAL MAINTENANCE:** This warranty covers ONLY manufacturers defective material and workmanship. It does not cover depreciation or damage caused by normal wear & tear, accident, improper maintenance, misuse or abuse of products. New PECO, Inc. products must be operated and maintained in accordance with the instructions furnished in the manuals. The cost of normal maintenance and normal replacement of service items such as belts, cutting blades, hoses, bags, etc., which are not defective shall be paid for by the purchaser.
4. **NO SERVICE CENTER WARRANTY:** The selling Service Center/Dealer makes no warranty on his own on any item warranted by New PECO, Inc. unless he delivers to purchaser a separate written warranty certificate specifically warranting the item. The Service Center or Dealer has no authority to make any representation or promise on behalf of New PECO, Inc. or to modify the terms of the original warranty in any way.
5. **NO REPRESENTATIONS ADDITIONAL WARRANTIES, DISCLAIMER:** Neither New PECO, Inc. nor any company affiliated with New PECO, Inc. makes any warranties, representations or promises as to the quality of performance of its products other than those set forth herein. Except as described above, New PECO, Inc. makes no other warranties **AND SPECIFICALLY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES OF FITNESS AND MERCHANTABILITY.**
6. **REMEDIED EXCLUSIVE:** The only remedies the purchaser has in connection with the breach or performance of any warranty on New PECO, Inc. consumer products are set forth above. In no event will New PECO, Inc. be liable for special incidental or consequential damages.

Warranty service is available through your local authorized service dealer or distributor. If you do not know the dealer or distributor in your area, search by your zip code on [www.lawnvac.com](http://www.lawnvac.com) or contact our Sales Department at New PECO, Inc. 800-438-5823 or email [Sales@lawnvac.com](mailto:Sales@lawnvac.com).

# Section I - INTRODUCTION AND DESCRIPTION

## Introduction

We are pleased to have you as a PECO customer. Your collection system has been designed to give you a low maintenance, simple, and effective way to collect the grass clippings from your mower. The manuals are provided to give you the necessary instructions to properly mount, operate and maintain the collection system on your mower. Please read this manual thoroughly. Understand what each control is for and how to use it. Observe all safety decal precautions on the machine and noted throughout the manual.

**NOTE:** All references made to right, left, front, rear, top or bottom are as viewed from the normal operator's position on the mower.

## Description

The grass collection system is designed for turf maintenance where there is a need to collect the grass clippings as the mower cuts the turf. It is also used for picking up leaves in pre-season and post-season clean-up. The blower, mounted on the right side of the unit, uses a belt and gearbox system from the engine PTO shaft. Drive train protection comes through belt slippage. The blower draws grass clippings from the discharge area of the cutting deck back to the collection bags at the rear portion of the mower frame. The operator can engage the blower with a push of the over-center linkage on the right side of the unit. Once the bags are full with clippings, they can be easily released for dumping.

## Section II - INSTALLATION FOR USE

### Preparation Of Mower

**NOTE:** The mower deck PTO belt must be removed from the electric clutch before continuing with the installation. Refer to your mower's owner's manual for instructions on PTO belt removal.

From the underside of the engine, disconnect the wiring harness attached to the electric clutch. Remove the bolt and electric clutch from the mower. Refer to Figure A.

Figure A

Remove Bolt

D-Drive Spacer

Upon removal of clutch determine if your mower is equipped with a D-drive spacer. If so, then proceed to Figure B. If your mower is equipped with bolt, fender and lock washer without D-drive spacer proceed to Figure C. Remove the D-drive spacer using an arbor press or equivalent. On removal, adjacent bearing OUTER race must be supported or bearing damage may occur. Refer to Figure B.

Figure B

Figure C

Remove 7/16"-20 Bolt & Washers

The engine pulley assembly must be installed using an arbor press or equivalent. During installation, opposite bearing inner race must be supported or bearing damage may occur. Refer to Figure D.

Figure D

Once the Engine Pulley Bushing is installed, reattach the clutch assembly & deck PTO belt to the mower and then review Figure E.

Figure E

To assemble and fasten the Engine Pulley, align the Engine Pulley Bushing to the mower's clutch pulley and fasten using (1) Clamp Washer, (1) Lock Washer, and (1) Hex Bolt. Torque the bolt to 55 ft./lbs. The added pulley will power the collection system and should resemble Figure F when installed.

Figure F

Engine Pulley Assembled Into Electric Clutch

## Top Side Frame Bracket Installation

Before the installation of the Top Side Frame Brackets, locate and remove the hardware used to secure the lower part of the ROPS to the mower, refer to Figure A. It is recommended to work and install on one side first before moving onto the other side.

Note: Some parts and part features have been hidden from view for visual clarity.

Place and position the Top Frame Bracket / Right (Item #1) in between the mower's rear frame and align the bolt holes of the Top Frame Bracket / Right to the ROPS bolt holes. Refer to the Figures below.

Secure the Top Frame Bracket / Right to the mower relatively loose by using (2) 1/2"-13 x 3-1/2" GR5 HHCS (Item #2), (2) 1/2" Flat Washers (Item #3) and (2) 1/2"-13 Flange Nuts (Item #4). Refer to Figure A.

Repeat the procedure for the opposite side. Keep the hardware relatively loose until after the installation on pg 11.

Figure B

Item #	Part #	Desc.	Qty.
1	B2595	Top Frame Bracket / Right	1
2	K1237	1/2"-13 x 3-1/2" HHCS GR5	2
3	K0055	Flat Washer 1/2" / 1.383 OD x .560 ID x .120 T	2
4	K1246	Flange Nut 1/2"-13	2

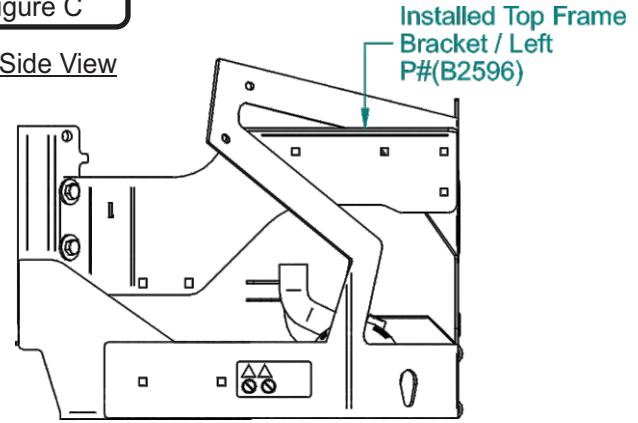

Figure C

Left Side View

## Side Frame Bracket Installation

Before the installation of the Side Frame Brackets, locate and remove the (2) set of hardware used to secure the lower part of the mower's rear frame, refer to Figure A. It is recommended to work and install on one side first before moving onto the other side. It is also recommended to remove the right rear roller and roller mount bracket for clearance of the PTO Installation. See Figure A.

Note: Some parts and part features have been hidden from view for visual clarity.

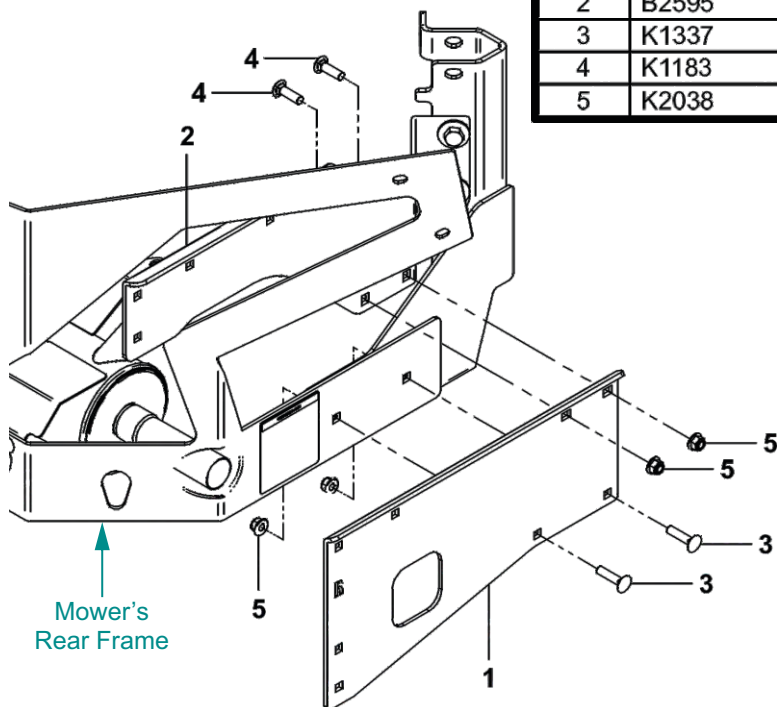

Place and position the Right Frame Bracket (Item #1) to the mower's lower right frame side and align the bolt holes of the Right Frame Bracket to the Top Frame Bracket / Right (Item #2) and the mower's frame. Refer to the Figures B.

Secure the Right Frame Bracket relatively loose to the mower by using (2) 3/8"-16 x 1-1/2" HHCS (Item #3) and (2) 3/8"-16 Flange Nuts (Item #5). Secure the Right Frame Bracket relatively loose to the Top Frame Bracket / Right by using (2) 3/8"-16 x 1-1/4" HHCS (Item #4) and (2) 3/8"-16 Flange Nuts (Item #5). Refer to Figure B.

Keep the hardware relatively loose until after the installation on pg 11.

Figure B

Item #	Part #	Desc.	Qty.
1	B2593	Right Frame Bracket	1
2	B2595	Top Frame Bracket / Right	1
3	K1337	Carriage Bolt 3/8"-16 x 1-1/2" / Zinc / GR5	2
4	K1183	Carriage Bolt 3/8"-16 x 1-1/4"	2
5	K2038	Ny-Flange Lock Nut 3/8"-16	4

## Side Frame Bracket Installation (cont.)

Repeat the procedure for the installation of the Left Frame Bracket (Item #1).

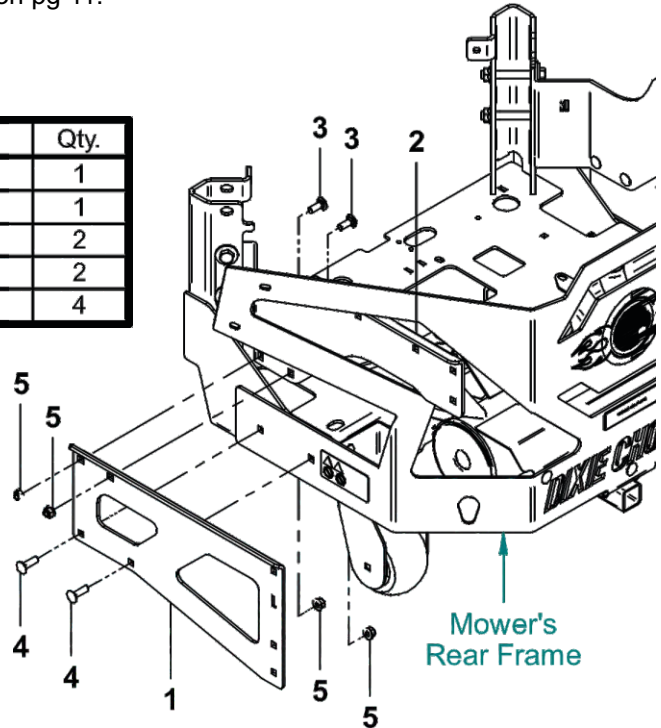

To secure the Left Frame Bracket (Item #1) to the mower's rear lower Left side frame use (2) 3/8"-16 x 1-1/4" HHCS (Item #4) and (2) 3/8"-16 Flange Nuts (Item #5). Refer to Figure C.

To secure the Left Bracket to the Top Frame Bracket / Left (Item #2) use (2) 3/8"-16 x 1" HHCS (Item #3) and (2) 3/8"-16 Flange Nuts (Item #5). Refer to Figure C.

Keep the hardware relatively loose until after the installation on pg 11.

Figure C

Item #	Part #	Desc.	Qty.
1	B2594	Left Frame Bracket	1
2	B2596	Top Frame Bracket / Left	1
3	K1182	Carriage Bolt 3/8"-16 x 1" / Zinc / GR5	2
4	K1183	Carriage Bolt 3/8"-16 x 1-1/4"	2
5	K2038	Ny-Flange Lock Nut 3/8"-16	4

## Main Frame Bracket Installation

Before installing the Main Frame Bracket (Item #1) locate and remove the set of hardware on the mower's lower rear frame and the (2) set securing the mower's hitch receiver. Refer to Figure A.

Note: Some parts and part features have been removed from view for visual clarity.

Figure A

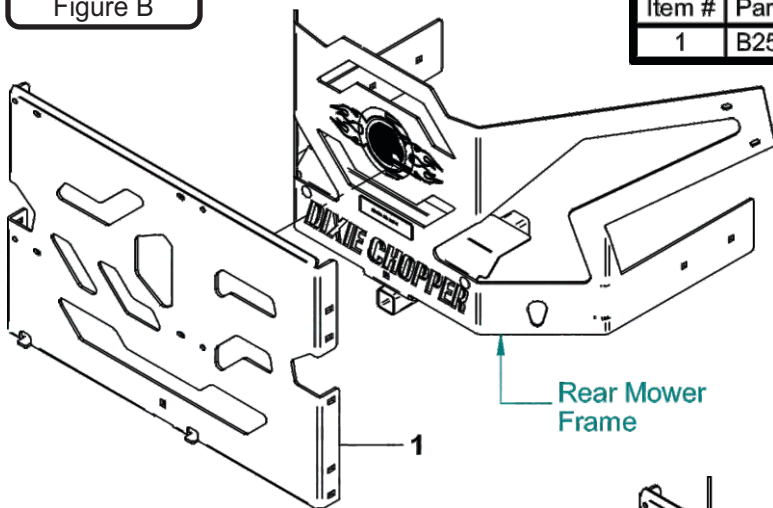

## Main Frame Bracket Installation (cont.)

First, position and align the Main Frame Bracket (Item #1) to the mower's rear frame and align the center and tab bolt holes to those on the mower and hitch receiver. Refer to the Figures below. Next, secure the Main Frame Bracket relatively loose to the mower's rear by reinstalling the removed hardware from before, refer to Figure C.

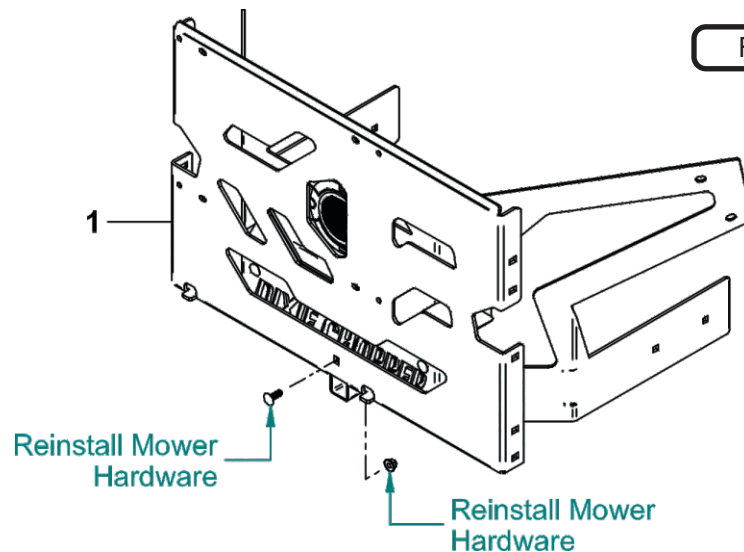

Note: Some parts and part features have been removed from view for visual clarity.

Figure B

Item #	Part #	Desc.	Qty.
1	B2592	Main Frame Bracket	1

Figure C

Then, secure the Main Frame Bracket to the mower's hitch receiver by using (2) 3/8"-16 x 1-1/4" Carriage Bolts (Item #2) and (2) 3/8"-16 Ny-Flange Lock Nuts (Item #3). See Figure D.

Keep the hardware relatively loose.

Figure D

Item #	Part #	Desc.	Qty.
1	B2592	Main Frame Bracket	1
2	K1183	Carriage Bolt 3/8"-16 x 1-1/4"	2
3	K2038	Ny-Flange Lock Nut 3/8"-16	2

## Main Frame Bracket Installation (cont.)

Finally, secure the Main Frame Bracket (Item #1) to the Left Frame Bracket (Item #2) and Top Frame Bracket / Left (Item #3) by using (3) 3/8"-16 x 1" Carriage Bolts (Item #4), (2) 3/8"-16 x 1-1/4" Carriage Bolts (Item #5) and (5) 3/8"-16 Ny-Flange Lock Nuts (Item #6). Refer to Figure E.

Tighten all hardware at this point including hardware on this side of the installation.

Figure E

Item #	Part #	Desc.	Qty.
1	B2592	Main Frame Bracket	1
2	B2594	Left Frame Bracket	1
3	B2596	Top Frame Bracket / Left	1
4	K1182	Carriage Bolt 3/8"-16 x 1" / Zinc / GR5	5
5	K2038	Ny-Flange Lock Nut 3/8"-16	5

Secure the Main Frame Bracket (Item #1) to the Right Frame Bracket (Item #2) and Top Frame Bracket / Right (Item #3) by using (3) 3/8"-16 x 1" Carriage Bolts (Item #4), (2) 3/8"-16 x 1-1/4" Carriage Bolts (Item #5) and (5) 3/8"-16 Ny-Flange Lock Nuts (Item #6). Refer to Figure F.

Keep the hardware on this side relatively loose until after the installation of the PTO Mount Brackets from pg 12-13.

Figure F

Item #	Part #	Desc.	Qty.
1	B2592	Main Frame Bracket	1
2	B2593	Right Frame Bracket	1
3	B2595	Top Frame Bracket / Right	1
4	K1182	Carriage Bolt 3/8"-16 x 1" / Zinc / GR5	3
5	K1183	Carriage Bolt 3/8"-16 x 1-1/4"	2
6	K2038	Ny-Flange Lock Nut 3/8"-16	5

## Lower PTO Mount Bracket Installation

Before installing the Lower PTO Mount Bracket (Item #1) loosen and remove the (2) 3/8"-16 x 1-1/2" Carriage Bolts (Item #3) previously used to secure the bottom right of the Right Frame Bracket (Item #2), see Figure below.

Position the Lower PTO Mount Bracket (Item #1) to the Right Frame Bracket (Item #2) aligning the row of carriage bolt holes between the two parts. Secure the Lower PTO Mount Bracket relatively loose by using the (2) previously removed 3/8"-16 x 1-1/2" Carriage Bolts (Item #3), (1) 3/8"-16 x 1-1/4" Carriage Bolt (Item #4) and (3) 3/8"-16 Ny-Flange Lock Nuts (Item #5). Refer to Figure below.

Note: Some parts and part features have been hidden from view for visual clarity with the figures below.

Item #	Part #	Desc.	Qty.
1	B2598	PTO Mount Bracket / Lower	1
2	B2593	Right Frame Bracket	1
3	K1337	Carriage Bolt 3/8"-16 x 1-1/2" / Zinc / GR5	2
4	K1183	Carriage Bolt 3/8"-16 x 1-1/4"	1
5	K2038	Ny-Flange Lock Nut 3/8"-16	3

## Top PTO Mount Bracket Installation

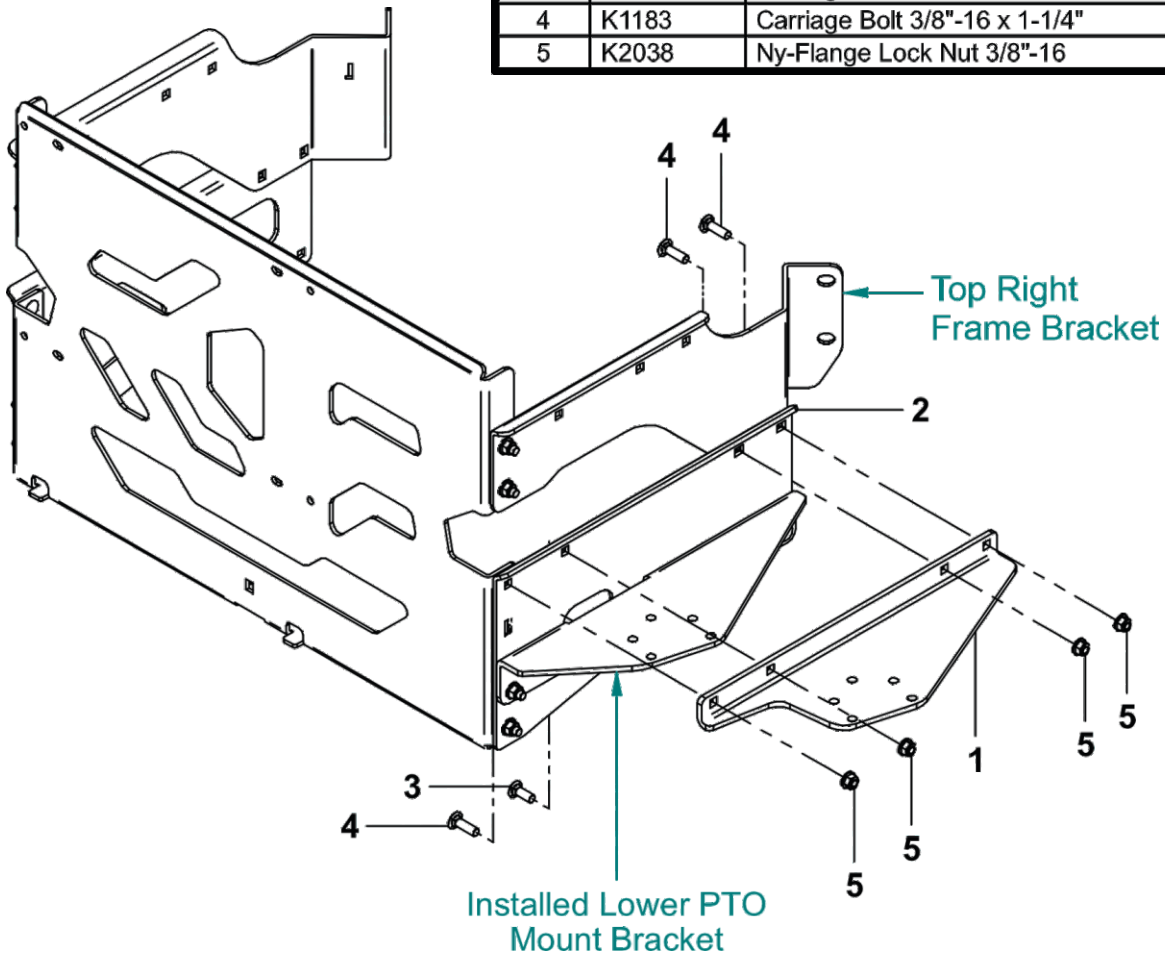

Before installing the Top PTO Mount Bracket (Item #1) loosen and remove the (2) 3/8"-16 x 1-1/4" Carriage Bolts (Item #4) previously used to secure the bottom right of the Top Right Frame Bracket to the Right Frame Bracket (Item #2), see Figure below.

Position the Top PTO Mount Bracket (Item #1) to the Right Frame Bracket (Item #2) aligning the row of carriage bolt holes between the two parts. Secure the Top PTO Mount Bracket relatively loose by using the (2) previously removed bolts and adding (1) more 3/8"-16 x 1-1/2" Carriage Bolts (Item #3), (1) 3/8"-16 x 1-1/4" Carriage Bolt (Item #4) and (4) 3/8"-16 Ny-Flange Lock Nuts (Item #5). Refer to Figure below.

Tighten all hardware at this time.

Note: Some parts and part features have been hidden from view for visual clarity with the figures below.

Item #	Part #	Desc.	Qty.
1	B2597	PTO Mount Bracket / Top	1
2	B2593	Right Frame Bracket	1
3	K1182	Carriage Bolt 3/8"-16 x 1" / Zinc / GR5	1
4	K1183	Carriage Bolt 3/8"-16 x 1-1/4"	3
5	K2038	Ny-Flange Lock Nut 3/8"-16	4

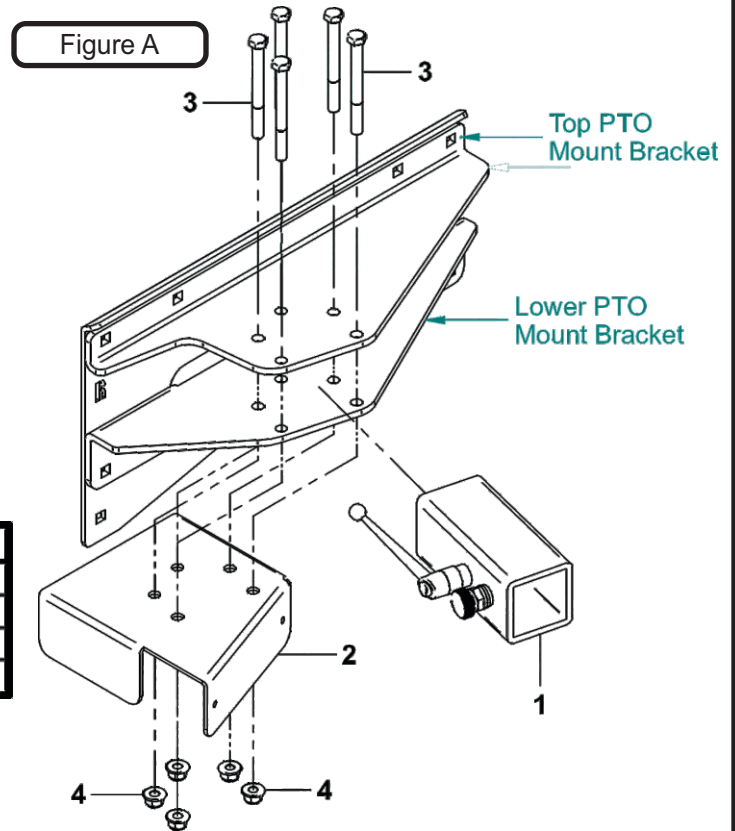

## Mount Arm / Receiver Tube Assembly & Exhaust Shield / Top Installation

First, place (5) Grade 5 3/8"-16 x 3-1/2" HHCS (Item #3) into the bolt holes of both the Top & Lower Mount Brackets, refer to Figure A. Then, position and place the Receiver Tube Assy / Mount Arm (Item #1) between the Mount Brackets and bolts. Next, align and position the Exhaust Shield / Top (Item #2) under the Lower PTO Mount Bracket as shown in Figure A. Finally, secure the Receiver Tube Assy / Mount Arm & Exhaust Shield / Top by fastening (5) 3/8"-16 Ny-flange Lock Nuts (Item #4) to the (5) Grade 5 3/8"-16 x 3-1/2" HHCS (Item #3). Refer to Figure A.

Note: Some parts and part features have been hidden from view for visual clarity.

Item #	Part #	Desc.	Qty.
1	A2207	Receiver Tube Assy. / Mount Arm	1
2	C0124	Exhaust Shield / Top	1
3	K1012	3/8"-16 x 3.75" HHCS G5	5
4	K2038	Ny-Flange Lock Nut 3/8"-16	5

## Exhaust Shield / Bottom Installation

Position the Exhaust Shield / Bottom (Item #2) below and over the Exhaust Shield / Top (Item #1) as shown in Figure B. Align the bolt holes of the Top & Bottom Exhaust Shields and secure them together by using (4) 1/4"-20 x 1/2" Thread Cutting Screws (Item #3). Refer to Figure B.

Note: Some parts and part features have been hidden from view for visual clarity.

Item #	Part #	Desc.	Qty.
1	C0124	Exhaust Shield / Top	1
2	C0125	Exhaust Shield / Bottom	1
3	K0353	HWHTCS 1/4"-20 x 1/2"	4

## Lower Mount Tube Installation

To secure the (2) Lower Mount Tube (Item #1) to the Rear Lower Frame Bracket use (2) 5/16"-18 x 2" x 2-1/2" U-Bolt (Item #2) and (4) 5/16"-18 Ny-Flange Locknuts (Item #3) PER TUBE. Allow the Lower Mount Tubes to rest on the lower tab of the Rear Frame Bracket. Refer to Figure A.

Note: Some parts and part features have been hidden from view for visual clarity.

## Upper Frame Assembly Installation

Slide the Upper Frame Assembly down onto the Lower Mount Tubes and secure using (2) Clevis Pins (Item #2) and (2) Rue Ring Cotter Pin Clips (Item #3). Refer to Figure B.

Note: Some parts and part features have been hidden from view for visual clarity.

Figure B

Item #	Part #	Desc.	Qty.
1	A2068	Upper Frame Assembly P3B Generic Gen 2	1
2	K0133	Clevis Pin 1/2" x 2-1/2"	2
3	K1437	Rue Ring Cotter Pin	1

## PTO Drive Assembly

Once the Mount Arm Assembly is installed and secured to the mower, assemble the Drive Assembly P#(A2061\_02), Belt Guard Assembly P#(A2069\_02) & Idler Mount Assembly P#(A2067\_02).

First, attach the Belt Guard Assembly P#(A2069\_02) to the Drive Assembly P#(A2061\_02) using (2) 1/4"-20 x 5/8" Carriage Bolts P#(K1010) and (2) 1/4"-20 Ny-Flange Lock Nuts P#(K2014). Refer to Figure A. **Leave Bolts Loose.**

### BELT GUARD ASSY. HOLES

Notice Marked Holes Below;  
For This Installation, Use Holes  
Marked With The Letter 'P'

Figure A

Item #	Part #	Desc.	Qty.
1	K1010	1/4"-20 x 5/8" Carriage Bolt	2
2	K2014	1/4"-20 Ny-Flange Lock Nut	2

## PTO Drive Assembly (Continued)

Attach the Idler Mount Assembly P#(A2067\_02) to the Drive Assembly using (1) 3/8"-16 x 1" HHCS (A) (Item #1), (1) 3/8"-16 x 1" Carriage Bolt (B) (Item #2) and (2) 3/8"-16 Ny-Flange Lock Nuts (Item #3). Refer to Figure B.

Leave Bolts Loose (Note: Orientation of bolts A & B.)

Next, secure the Idler Mount Assembly P#(A2067\_02) to the Belt Guard Assembly P#(A2069\_02) using (2) 3/8"-16 x 1" Carriage Bolts (Item #2) and (2) 3/8"-16 Ny-Flange Lock Nuts (Item #3). Refer to Figures C & D. Tighten All Bolts.

Figure B

Item #	Part #	Desc.	Qty.
1	K1191	HHCS 3/8"-16 x 1" GR5	1
2	K1182	Carriage Bolt 3/8"-16 x 1"	3
3	K2038	Ny-Flange Lock Nut 3/8"-16	4

Figure C

Figure D

## Drive Assembly and Belt Installation

(Note: It is recommended that someone assist during this step.)

Insert the Drive Assembly into the receiver tube on the Mount Arm Assembly until the Knob Plunger Pin engages. Once in place, turn Lock Handle clockwise until tight. Next, feed the AK83 Belt P#(M0315) between the Belt Guard and the Idler Mount Assembly. Place belt around the Engine Drive Pulley on the underside of the mower. While one person inserts a screw driver (or similar tool) into the Idler Mount Assembly and rotates lever arm clockwise, enough to relieve all tension from belt, place belt around the Drive Assembly Pulley. Once the belt is in position, carefully release the tension to tighten belt.

Refer to the images below.

## Boot Kit Installation

First, remove the mower's Operator Controlled Discharge Chute (OCDC) and attach the Boot Plate Adapter (Item #7) to the far right mounting hole as shown in Figure B using (1) 3/8"-16 x 1" Hex Head Cap Screw (Item #8), (1) 3/8" Flat Washer (Item #9) and (1) 3/8"-16 Ny-Flange Lock Nuts (Item #6).

Next, secure the Boot Plate (Item #2) to the Aluminum Boot (Item #1) using (2) 3/8"-16 x 1" Carriage Bolts (Item #5) and (2) 3/8"-16 Ny-Flange Lock Nuts (Item #6). Insert the Carriage Bolts from the inside of the Boot so the threads are on the top of the Boot. This will prevent grass clippings from collecting on the threads. Leave the hardware loose until the boot plate has been attached to the mower deck.

Then, align the Boot Plate Bushings to the Boot Plate Adapter Bushings. Insert the Boot Rod (Item #3) through the Boot Plate Adapter & Boot Plate Bushings.

Finally, secure the Boot Rod using a Hair Pin Clip (Item #4). With the Carriage Bolts (Item #5) still loose, adjust the position of the boot so that there is no gap between the mower deck and the boot. Once fully adjusted and positioned, tighten all hardware at this time.

Figure A

Item #	Part #	Desc.	Qty.

Figure B

Secure Boot Plate Adapter

## Top Assembly To Upper Frame Assembly Installation

Align the Top Assembly Pivot Holes to the Upper Frame Assembly. See Figure A below. Before fastening, pull Rubber Dust Guard outward to seal against Upper Frame Assembly (towards the mower's operator seat). Fasten the Top Assembly to the Upper Frame Assembly using (2) 5/16"-18 x 2-1/2" HHCS P#(K0125) and (2) 5/16"-18 Ny-Flange Locknuts P#(K2516). Leave the Ny-Flange Locknuts slightly loose to allow the Top Assembly to open and close easily.

Figure A

## Inlet Installation

Position the Top Assembly on its side with the Inlet Hole facing up. See Figure B. 1: Insert the Inlet from inside the Top Assembly, up through the Inlet Hole, until the Inlet Retaining Lip meets the Inlet Hole. 2: Position the Inlet as shown in Figure B, then pull the Inlet until a portion of the Inlet Retaining Lip protrudes from the Inlet hole. 3: Next, lift the Inlet as shown in Figure B until all of the Inlet Retaining Lip protrudes from the Inlet Hole. Once installed, the Inlet should pivot freely about the Inlet Hole.

Figure B

## Hinge Kit Assembly Installation

Assemble the Hinge Kit using (1) Latch Plate P#(B0884), (1) 5/16"-18 x 1-1/4" HHCS P#(K1156), (1) 5/16"-18 Ny-Flange Lock Nut P#(K2516), (3) 5/16" Flat Washers P#(K0042), (1) Latch Spacer P#(S0006), (2) Extra Heavy 5/16" Fender Washers P#(K0505) and (1) 5/16"-18 Lock Nut P#(K0506). Leave the nuts loose enough to allow fluid movement of the top when opening and closing. When opened, the top should rest in the Latch Plate Slot.

## Even Bag Fill Adjustment

Flap can be adjusted Up/Down depending on mowing conditions. Adjust flap up to allow more dense material to reach left bag. Adjust flap down to allow less dense material to reach the right bag. Once adjusted properly, both bags should fill evenly, but may require further adjusting when mowing conditions change.

## Bag Assembly

First, take one of the Bag Ring Split Ends and insert it through the Bag Seam Opening. Next, rotate the Bag around the Bag Ring (1) full turn (360 degrees) until the Bag Ring Split Ends and the Bag Seam Opening are positioned on the same side. Then, connect the Bag Ring Split Ends using (1) End Connector. Last, rotate the Bag Ring and the End Connector Assembly (1/2") turn (180 degrees) to position the Connector opposite of the Bag Seam Opening. Note Final End Connector Location below in Figure A. Repeat for each Bag.

Figure A

## Bag Assembly Installation

Slide the Completed Bag Assembly into the Upper Frame Assembly Rails and close the Top Assembly. Fasten the Draw-Latch on either side to hold the bagger closed.

## Wiring Harness Installation

### WARNING

**To Prevent Serious Injury-  
Proper Installation Of Safety Interlock Harness  
Is Mandatory. Please Check That All Interlock  
Points Work Correctly Once Installed.**

Route the 2 Way Metri-Pack Connector (P#P0280) around the right side of the engine and down between the side of the ROPS to the right of the Right Mount Plate connecting the Quick Connect Plug (#1) located on the PTO Drive. Refer to Figure A.

Attach the Positive Lead from the Wiring Harness (P#A2144) connected to the Metri-Pack 2 Way Connector (P#P0280) to the PTO Switch (P#J2001) by connecting the Female Disconnecter (P# P0106) from the Positive Lead to the Switch Terminal (A) on the Switch. Refer to Figure B on the next page.

Insert the PTO Switch in and through the PTO Switch Bracket (P#B1020) then attach and secure the Safety Cover (P#P0073).

Before routing the PTO Switch (#2), locate and loosen the existing cap head screw located on the bottom right side of the mower's control panel. Attach the PTO Switch Bracket by sliding it behind the cap head screw and tightening the screw. Refer to Figure A. (Note: This is the recommended positioning of the PTO Switch, the PTO Switch could be mounted anywhere within reasonable distance and clearance to the right of the operator's seat)

Route the PTO Switch to the positive terminal of the battery (#3) using the Ring Terminal (P#P0086) of the Positive Lead to secure the attachment. Route the Negative Lead to the engine block (#4) using the Ring Terminal of the Negative Lead to secure the attachment. Refer to Figure A.

Use the zip ties (P#J0245) that are provided to secure the wires in place.

Figure A

# Wire Harness Installation (Continued)

Figure B

## Length Of Hose Adjustment

The hoses in the following steps must be cut to fit your machine. Do not cut the hoses until you have tried to fit them on your machine. Remember that the hoses need to be long enough to allow for the opening and closing of the collection system as well as allowing ample clamping surface between each component.

## Upper Hose Installation

Slide a Hose Clamp P#(J0060) over one end of the 6" Upper Hose. Secure this end of the 6" Upper Hose to the Blower Outlet. See Figure below for details. Secure opposite end of the 6" Upper Hose to the Inlet with another Hose Clamp P#(J0060). Make sure both ends are securely fastened by tightening the Hose Clamp.

## Lower Hose To Blower Cone Installation

Slide a Hose Clamp P#(J0080) over both ends of the Lower Hose. Secure one end of the Lower Hose to the Blower Cone and fasten by tightening the Hose Clamp.

## Lower Hose To Boot Installation

Take the unattached end of the Lower Hose and secure it to the circular end of the Boot and fasten by tightening the Hose Clamp.

Tip: Before securing Hose Clamp fully, rotate Lower Hose counter-clockwise (away from yourself) approximately 1" to aid in retaining Boot to mower deck.

## Impeller Blade Removal/Replacement

**To Remove:** First remove the 5/16"-24 x 1" HHCS P#(K0428) (#1), Taper Lock Bushing Washer P#(K0284) (#3), (2) 5/16 Flat Wahers P#(K0042) and Spacer Bushing P#(S0159) (#4) from the Taper-Lock Bushing P#(S0157) (#5). Next remove the (2) 1/4"-20 x 1" HHCS (#2) and place them into the threaded holes of the Taper-Lock Bushing (#5). Gradually thread each bolt evenly into the Taper-Lock Bushing, forcing the blade to break-away from the Taper-Lock Bushing. If the Impeller will not move, carefully hit the base of the Impeller, between each vein, with a hammer, then try again.

**To Replace:** Place Impeller Blade over the engine shaft. Slide the Taper-Lock Bushing (#5) on to the engine shaft and into the Impeller Blade, aligning the **non-threaded** holes of the Taper-Lock Bushing to the threaded holes of the Impeller Blade. Fasten by using (2) 1/4"-20 x 1" HHCS (#2), (1) Spacer Bushing (#4) (1) Taper-Lock Bushing Washer (#3), and (1) 5/16"-24 x 1" HHCS (#1). Torque to the proper specifications in the torque chart on the back of this manual. Next, rotate the Impeller Blade to ensure that the blade is clear of contact on all sides of the blower housing.

## Weight Kit Installation

Remove the existing front name plate by removing the top two screws and bottom two screws. Refer to Figure A. Remove the footrest to expose (4) large carriage bolts and nuts, located behind the name plate. Remove and keep (2) existing nuts from the existing carriage bolts, (1) from the far lower left and (1) from the far lower right. Refer to Figure B. Place Weight Bracket (#1) over the front of the mower and under the footrest as shown in Figure B. Replace and tighten the (2) nuts removed earlier to the existing carriage bolts.

Figure A

Figure B

Insert (2) Suitcase Weights (#2) per side onto the weight bracket & align the holes of the Suitcase Weights to the holes of the Weight Bracket. Secure each set of (2) Suitcase Weights by using (1) Hitch Pin (#3) and (1) Hair Pin Cotter (#4).

Figure C

Item #	Part #	Desc.	Qty.
1	B0989	Weight Bracket	1
2	Y0025	28 lb. Suitcase Weight	4
3	A0312	Hitch Pin Weldment	2
4	K1478	Hair Pin Cotter / Double Loop	4

## Weight Kit Installation (Continued)

Position and align the Caster / Weight Bracket Support (Item #2) to the inside of the right caster of the mower. Refer to Figure D. Next, align the Right Caster / Weight Bracket (Item #1) to the outside of the mower's right caster and secure the Right Caster / Weight Bracket using (3) 3/8"-16 x 1-1/4" Carriage Bolts (Item #3) and (3) 3/8"-16 Ny-Flange Lock Nuts (Item #4). Refer to Figure D.

Figure D

NOTE: Position the bolt holes with the through holes of the Right Caster

Item #	Part #	Desc.	Qty.
1	B1098	Right Caster / Weight Bracket	1
2	B1099	Caster / Weight Bracket Support	1
3	K1183	Carriage Bolt 3/8"-16 x 1-1/4"	3
4	K2038	Ny-Flange Lock Nut 3/8"-16	3

Insert (2) Suitcase Weights (Item #1) into the Right Caster / Weight Bracket and secure the Suitcase Weights using (2) 1/2" x 5" Clevis Pin (Item #2) and (2) Hair Pin Cotter / Double Loop (Item #3). Refer to Figure E.

Figure E

Item #	Part #	Desc.	Qty.
1	Y0025	28 lb. Suitcase Weight	2
2	K1482	1/2" x 5" Steel Clevis Pin	2
3	K1478	Hair Pin Cotter / Double Loop	2

NOTE: The Clevis Pin and Hair Pin Cotter used under the weights are used to lock the weights in place.

Blades

## SECTION III OPERATING INSTRUCTIONS

### General Safety

Only qualified people familiar with this operator's manual and the mower's operator's manual should operate this machine.

### Operation And Tips On Mowing

- A. Perform BEFORE EACH USE the maintenance list referenced in Section IV.
- B. Start mower.
- C. With the mower at high idle speed, engage the mower deck.
- D. While seated in the operator's seat, move Bagger PTO switch to the on position. With the PTO assembly engaged, you can proceed to operate the control levers of the mower.

**NOTE:** If the collection system does not appear to be collecting the grass clippings, disengage the deck and PTO assembly, then, engage the parking brake and turn the mower off. Check upper and lower hoses for any clogs.

To obtain the maximum effectiveness from your collection system, the tips listed below should be followed:

- \* Watch your speed- Normal conditions will allow a speed of up to approximately 4 mph, but thick, heavy damp conditions will require reduced ground speed.
- \* Mow with sharp blades- A sharp blade cuts cleaner.
- \* Wet grass and leaves will decrease effectiveness and will increase horsepower requirements.
- \* Mow at higher cutting heights- Remove and mulch no more than 2" of grass length with each mowing. (Experts recommend not cutting off more than 1/3 of the grass blade length at any given time.)
- \* Mow twice, at different height settings, (high, then low), if grass is extra tall.
- \* Remember that horsepower requirements will vary with the mowing conditions such as type and height of turf grass, moisture content, amount of leaves, whether the terrain is flat or hilly, etc.

### Disengagement Of The PTO Assembly

- A. To disengage the PTO assembly, move Bagger PTO switch to the off position.

**WARNING:** The PTO assembly blades will continue to spin. DO NOT TOUCH the PTO assembly, pulleys, or the belt until the tractor is turned off. DO NOT adjust the belt tension until the mower is turned off. Refer to the Belt Installation section of the manual.

### Unloading The Collection System

**NOTE:** To determine when the collection bags are full, follow the following steps:

- A. Stop the forward movement of the mower.
- B. Disengage the mower deck.
- C. Disengage the PTO assembly.
- D. Engage the parking brake.
- E. Once the parking brake has been engaged, then and only then, walk behind the mower and check the collection bags by first unhooking the rubber strap with S-hook that secures the plastic top, then lift the plastic hood. Load in bags should not exceed the height of the installed bag.
- F. To remove the bags from the frame, slide bags out and turn bags over to deposit clippings.
- G. Slide empty bags back onto the frame and secure plastic top with the rubber strap with S-hook.

**NOTE:** Do not allow collection bags to become over-filled as potential damage may occur to your equipment. Also, be sure to clean the hood screen as needed.

## SECTION IV MAINTENANCE

### Maintenance Checklist

Before each use:

1. Check blades and spindles to be sure that no foreign objects, such as wire or steel strapping bands, are wrapped around them.
2. Inspect blades for wear. Replace if necessary. If it is necessary to sharpen the blades, remove the blades from the spindles before sharpening. DO NOT sharpen blades while still attached to the mower.

3. Make sure all shields are in place and in good condition. Repair or replace any missing or damaged shields.
4. Perform lubrication per instructions.
5. Listen for abnormal sounds, which might indicate loose parts, damaged bearings, or other damage. Correct any deficiency before continuing operation.
6. With the engine off, engage the blower assembly. Check the belt tension and inspect the pulley belt for cracks or tears.
7. Check for wear or deterioration of the upper or lower hoses. If there are any portions of the hose that have been torn or worn through, replace immediately.

After Each Use:

1. Clean all debris from machine especially from the container, underneath the belt shields, and safety decals. Replace any missing or illegible decals.
2. Inspect the unit for worn or damaged components. Repair or replace before the next use. Any replacement component installed during repair shall include the component's current safety decal specified by the manufacturers to be affixed to the component.
3. Under normal usage, the bag material is subject to deterioration and wear and should therefore be frequently checked for necessary replacement. Any replacement bag should be checked to ensure compliance with the original manufacturer's recommendations or specifications.
4. Check belt for proper tension.

## 4-2 Lubrication

Gearbox:

**NOTE:** The gearbox is filled with 6.0 oz. of Mobilube HD Plus 80W-90 oil and permanently sealed. There is no need for scheduled lubrication. The oil level should only be checked if a leak is observed or if a change in gearbox noise is noticed.

Operators are recommended to check for leaks weekly. If a leak is observed, both the gasket and the seals are recommended to be replaced.

Replace the oil using 5.5 oz. of the recommended Mobilube HD Plus 80W-90 oil. Be sure to not overfill.

Blower Assembly:

**NOTE:** The following is for older PTO models that contain a greaseable zirc fitting. Newer models contain maintenance-free bearings and are without a greasable fitting.

1. On initial use: Grease the fitting on the blower shaft.
2. Every 25 hours of use: Re-grease the grease fitting.

**NOTE:** Use only white lithium based grease for lubrication of the shaft on the blower assembly.

## SECTION V - PARTS & SERVICE

### 5-1 Parts And Service Information

Collection system owners should record the name and telephone number of their Service Center. Your Service Center will be happy to supply replacement parts, accessories, and do any service or repairs to your collection system. If for any reason your Service Center is unable to service your collection system or supply replacement parts, contact New PECO, Inc. and include the following information on the chart below.

# TORQUE SPECIFICATIONS

Proper torque for American fasteners used on Peco equipment.  
Recommended Torque in Foot Pounds (Newton Meters).\*

## AMERICAN Bolt Head Markings

SAE Grade 2  
(No Dashes)

SAE Grade 5  
(3 Dashes)

SAE Grade 8  
(6 Dashes)

WRENCH SIZE (IN.) "A"	BOLT DIAMETER (IN.) "B" AND THREAD SIZE	SAE GRADE 2	SAE GRADE 5	SAE GRADE 8
7/16	1/4 - 20 UNC	6 (7)	8 (11)	12 (16)
7/16	1/4 - 28 UNF	6 (8)	10 (13)	14 (18)
1/2	5/16 - 18 UNC	11 (15)	17 (23)	25 (33)
1/2	5/16 - 24 UNF	13 (17)	19 (26)	27 (37)
9/16	3/8 - 16 UNC	20 (27)	31 (42)	44 (60)
9/16	3/8 - 24 UNF	23 (31)	35 (47)	49 (66)
5/8	7/16 - 14 UNC	32 (43)	49 (66)	70 (95)
5/8	7/16 - 20 UNF	36 (49)	55 (75)	78 (106)
3/4	1/2 - 13 UNC	49 (66)	76 (103)	106 (144)
3/4	1/2 - 20 UNF	55 (75)	85 (115)	120 (163)
7/8	9/16 - 12 UNC	70 (95)	109 (148)	153 (207)
7/8	9/16 - 18 UNF	79 (107)	122 (165)	172 (233)
15/16	5/8 - 11 UNC	97 (131)	150 (203)	212 (287)
15/16	5/8 - 18 UNF	110 (149)	170 (230)	240 (325)
1-1/8	3/4 - 10 UNC	144 (195)	266 (360)	376 (509)
1-1/8	3/4 - 16 UNF	192 (260)	297 (402)	420 (569)
1-5/16	7/8 - 9 UNC	166 (225)	430 (583)	606 (821)
1-5/16	7/8 - 14 UNF	184 (249)	474 (642)	668 (905)
1-1/2	1 - 8 UNC	250 (339)	644 (873)	909 (1232)
1-1/2	1 - 12 UNF	274 (371)	705 (955)	995 (1348)
1-1/2	1 - 14 UNF	280 (379)	721 (977)	1019 (1381)
1-11/16	1-1/8 - 7 UNC	354 (480)	795 (1077)	1288(1745)
1-11/16	1-1/8 - 12 UNF	397 (538)	890 (1206)	1444 (1957)
1-7/8	1-1/4 - 7 UNC	500 (678)	1120 (1518)	1817 (2462)
1-7/8	1-1/4 - 12 UNF	553 (749)	1241 (1682)	2013 (2728)
2-1/16	1-3/8 - 6 UNC	655 (887)	1470 (1992)	2382 (3228)
2-1/16	1-3/8 - 12 UNF	746 (1011)	1672 (2266)	2712 (3675)
2-1/4	1-1/2 - 6 UNC	870 (1179)	1950 (2642)	3161 (4283)
2-1/4	1-1/2 - 12 UNF	979 (1327)	2194 (2973)	3557 (4820)

Proper torque for metric fasteners used on Peco equipment.  
Recommended torque in foot pounds (newton Meters).\*

## METRIC

Numbers appearing on bolt heads indicate ASTM class.

WRENCH SIZE (mm) "A"	BOLT DIA. (mm) "B"	ASTM 4.6	ASTM 8.8	ASTM 9.8	ASTM 10.9
8	5	1.8 (2.4)		5.1 (6.9)	6.5 (8.8)
10	6	3 (4)		8.7 (12)	11.1 (15)
13	8	7.3 (10)		21.1 (29)	27 (37)
16	10	14.5 (20)		42 (57)	53 (72)
18	12	25 (34)	74 (100)	73 (99)	93 (126)
21	14	40 (54)	118 (160)	116 (157)	148 (201)
24	16	62 (84)	167 (226)	181 (245)	230 (312)
30	20	122 (165)	325 (440)		449 (608)
33	22		443 (600)		611 (828)
36	24	211 (286)	563 (763)		778 (1054)
41	27		821 (1112)		1138 (1542)
46	30	418 (566)	1119 (1516)		1547 (2096)

\*Use 75% of the specified torque value for plated fasteners. Use 85% of the specified torque values for lubricated fasteners.

# Troubleshooting

2017 (v1.0)

## Collection System Performance

<b>Problem</b>	<b>Possible Cause</b>	<b>Corrective Action</b>
Abnormal Vibration	<ul style="list-style-type: none"> <li>• Cutting blades are bent or unbalanced</li> <li>• Loose blower pulley or pulley assembly</li> <li>• Impeller blade out of balance</li> </ul>	<ul style="list-style-type: none"> <li>• Install new cutting blade</li> <li>• Tighten the pulley</li> <li>• Contact dealer to replace</li> </ul>
Reduced collection system performance	<ul style="list-style-type: none"> <li>• Low engine speed</li> <li>• Plugged screen</li> <li>• Loose belt</li> <li>• Full collection bags</li> </ul>	<ul style="list-style-type: none"> <li>• Always operate collection system at full throttle</li> <li>• Remove debris, leaves, or grass clippings from the screen</li> <li>• Replace/tighten belt</li> <li>• Empty the collection bags</li> </ul>
Blower and hoses plugging too frequently	<ul style="list-style-type: none"> <li>• Collection bags are too full</li> <li>• Low engine speed</li> <li>• Grass is too wet</li> <li>• Grass is too long</li> <li>• Ground speed is too fast</li> <li>• Worn belt</li> <li>• Loose belt</li> </ul>	<ul style="list-style-type: none"> <li>• Dump more frequently</li> <li>• Always operate collection system at full throttle</li> <li>• Cut grass when it is dry</li> <li>• Cut the grass several times</li> <li>• Drive slower at full throttle</li> <li>• Replace belt</li> <li>• Adjust the pulley and tighten belts</li> </ul>
Debris blowout	<ul style="list-style-type: none"> <li>• Collection bags are too full</li> <li>• Plug/clog in the collection system</li> <li>• Ground speed is too fast</li> </ul>	<ul style="list-style-type: none"> <li>• Dump more frequently</li> <li>• Clean the collection system</li> <li>• Drive more slowly at full throttle</li> </ul>
Impeller doesn't rotate freely	<ul style="list-style-type: none"> <li>• Plug in the blower housing</li> <li>• Worn impeller blade</li> <li>• Shaft bearings bad/failing</li> </ul>	<ul style="list-style-type: none"> <li>• Clean the blower housing</li> <li>• Contact dealer to replace</li> <li>• Contact dealer to replace</li> </ul>
