# Walk Behind Blower

## FEATURES THAT MAKE THE DIFFERENCE

### HEAVY DUTY

The large, four vane impeller is housed inside a sturdy cast aluminum housing and is supported by a heavy duty steel frame.

### 90 DEGREE SWEEP ACTION NOZZLE

The nozzle can be infinitely adjusted from the handle and will stay in any position for easy cleanup, even in those difficult corners. The nozzle also has a height adjustment lever for variable height for specific needs.

### CONVENIENT CONTROLS

The cut off and engine speed controls are conveniently located within easy reach of the operator, for simple and safe operation.

### MANEUVERABILITY

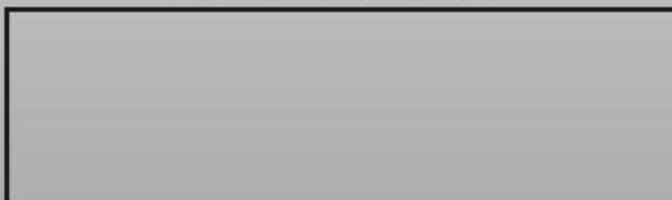

The heavy duty wheels have grease fittings and turf saver tires to ensure smooth operation on delicate turf. The two front wheels offer additional support and easy operation even on difficult terrain.
