

WHY PECO?

For Healthy, Carpet-Like Turf, Vac It!

Why Vacuum Your Lawn?

Turf grass experts agree: The more clippings and other debris you can remove from your lawn, the better. By eliminating thatch (dead grass clippings), water and fertilizers are significantly more efficient. This promotes quicker, deeper root growth, by virtually eliminating the breeding ground for various harmful fungi, and encourages thicker, lush turf.

Baggers and catchers do eliminate some clippings but tend to clog and depend on the mower blade's speed and deck design to work, often leaving well over half the cut grass blades to remain on your lawn and turn to thatch. PECO Lawn Vacs actually vacuum the turf as you mow.

Put Your Rake Over The Mantle!

PECO Lawn Vacs not only eliminate the need to rake grass clippings, but they are perfect for fall's blanket of leaves. The same vacuum and mulching action is the perfect answer to spending hours (or days) raking leaves.

Help Your Lawn, Your Garden, And The Environment.

You use less fertilizer and other chemicals on your lawn because vacuuming makes growth more efficient. (When you vacuum, you will get weed seeds, too!) Because the debris is so fine, it's perfect for garden mulch or adding to your compost pile. And because of various bans on lawn debris at landfills, you are eliminating that problem all together, as well as helping the environment.

What Makes PECO Decidedly Different?

In 1972, we introduced the original PECO Lawn Vac for Cub Cadet tractors. But in less than a year, we had models for six other brands. Today, we manufacture PECO Vacs for virtually every tractor and riding mower made!

Allied Approved.

PECO Vac Systems are "Allied Approved" by most major consumer and commercial mower and tractor manufacturers. PECO uses only industrial grade engines to drive our powerful vacuum systems. That alone is testament to the quality of our products. But PECO quality doesn't stop there.

Responsive Service.

Our authorized PECO Dealers offer excellent service after the sale and get full-time technical support directly from the factory. In emergency situations, we offer the "Code Red Policy." We will get "machine down" orders processed within 24 hours and delivered the next business day (optional).

Find The PECO Product That Is Right For You.

Check out the PECO Vacs and other fine products we offer to see how PECO can make your lawn and landscape care quick, easy and economical.
